Dear Sir/Madam,

RE: APPLICATION FOR THE POSITION OF M&E ADVISOR

I am writing to apply for the M&E Advisor position at UZ-CTRC, as advertised. With a Master's degree in Data Science and Informatics and three years of experience in data analysis and database management, I am excited about the opportunity to contribute to your team and support your programmatic goals.

In my previous roles, I have developed and managed databases while creating ETL tools to streamline data pipelines, significantly enhancing reporting efficiency. I am adept at overseeing M&E activities, including performance monitoring, data analysis, and reporting achievements to stakeholders such as CDC, PEPFAR, and MOHCC.

I have a strong track record in providing technical assistance to strengthen M&E systems and tools. My experience includes conducting capacity-building activities for M&E teams to ensure the collection, analysis, and presentation of high-quality data for improved programming. I also develop and oversee data quality assurance systems while monitoring program performance based on evaluation and performance monitoring plans.

I am committed to mentoring lower-level personnel and providing technical guidance, acting as a team lead when necessary. Additionally, I support the development of reports for CDC, PEPFAR, and other stakeholders, ensuring accurate and timely reporting to PEPFAR.

I am eager to bring my skills in data analysis and program monitoring to UZ-CTRC as an M&E Advisor, ensuring that data-driven insights inform decision-making and continuous improvement of projects.

Thank you for considering my application. I look forward to the opportunity to discuss how I can add value to your team.

Regards

Emmanuel Takawengwa
