## SUMMARY

Data Analyst and Database Administrator with experience in managing and analyzing complex data sets. Proficient in SQL, Python, and data visualization tools such as Power BI, focusing on transforming data into actionable insights. Experienced in database design and automation of data processes, enhancing efficiency and accuracy. Skilled in identifying trends to inform strategic decision-making and effectively communicating findings to diverse stakeholders. Committed to leveraging data and automation to drive business growth.

## EXPERIENCE

### Data Analyst

#### Biomedical Research and Training Institute

📅 04/2024 - Present 📍 Harare

##### Company Description

- Organizational SQL Database Development and Management
- Data Modeling
- Automation of data extraction, transformation and loading
- Develop reports that combine data from multiple datasets (Excel, Word, ODK, SQL Database)
- Acquire data from primary or secondary data sources and maintain data systems (ODK Central, Survey CTO)
- Analyze data for trends and patterns, and data interpretation
- Development of ETL tools and data pipelines to connect the database to the reporting tools
- Data systems development and maintainance
- SQL Database backup and restore
- Report Writing, weekly, monthly, quarterly, semi-annually and annually

### ICT Officer

#### Biomedical Research and Training Institute

📅 06/2020 - 03/2024 📍 Harare

##### Company Description

- Development and management of data collection systems using Python (Django), ODK
- Automation of ETL processes to streamline the reporting processes
- Data analysis with Excel, PowerBi, Python, R
- Data collection, cleaning and visualization
- SQL Database development and maintainance
- Error Analysis and debbuging

### Software Developer

#### PortableCloud Zimbabwe

📅 01/2020 - 04/2020 📍 Harare

##### Company Description

- Data systems development using Python, SQL, Javascript
- Tasks automation with Linux and bash
- Development of ETL tools to streamline data capturing, storage and analysis
- Data visualization with Python, PowerBi and Excel

## PASSIONS

💎 studying astrophysics

💎 Watching Tech videos

## TRAINING / COURSES

Python 3 programming

R Programming

The Data Scientist's Toolbox

Information Security: Context and Introduction

Finding Hidden Messages in DNA (Bioinformatics I)

Genome Sequencing (Bioinformatics II)

Understanding and Visualizing Data with Python

Data Collection and Processing with Python

## EDUCATION

MSc in DATA SCIENCE AND INFORMATICS

University of Zimbabwe

📅 2021 - 2023

BSc in COMPUTER SCIENCE

University of Zimbabwe

📅 2016 - 2019

Advanced Level

SpecissCollege

📅 2013 - 2015

## SKILLS

Python Programming

R Programming

Linux Administration

SQL Scripting

Javascript & JQuery Programming

Excel

PowerBi

Automation
